Maykell Sánchez Romero

Senior Software Engineer

kellsaro@gmail.com linkedin.com/in/kellsaro github.com/kellsaro x.com/kellsaro kellsaro.github.io
Ecuador, UTC-5 (available during US business hours, Eastern to Pacific). Open to remote roles.

Senior software engineer and computer scientist with 15+ years building production systems, from a national immigration platform serving millions of users to AI-powered SaaS products. I specialize in Ruby on Rails and Java with Spring Boot, and build products end to end with a rigorous AI-assisted engineering workflow, which I am also using to move my stack toward Elixir and Phoenix LiveView.

Technologies

Backend (Ruby)	**Ruby, Ruby on Rails, Sidekiq, RSpec**
Backend (Java)	Java, Spring Boot, Jakarta EE
Data & APIs	PostgreSQL, Redis, MySQL, DB2, REST APIs, GraphQL, Payments (Stripe), ETL (Apache Hop, Looker Studio)
Frontend	React, JavaScript, Hotwire (Turbo, Stimulus), Tailwind CSS
DevOps & quality	Docker, AWS (S3, EC2, RDS), Fly.io, Heroku, GitHub Actions (CI/CD), Git, Linux, Agile
AI engineering	Claude Code, Codex, Windsurf, LLM APIs (OpenAI, Claude, Gemini), Spec-driven development, Cross-agent code review, Agent rules and skills
Elixir (growing)	Elixir, Phoenix LiveView, Ash Framework, Oban

Projects

Agonai
Competitive intelligence system for the AI era.
Elixir, Phoenix LiveView, Ash, LLMs, agonai.io

TechRepair
Operations platform for wind turbine blade and tower maintenance teams, built around the work order lifecycle, where projects, teams, field activity and client reports converge.
Elixir, Phoenix LiveView, Ash, GraphQL, techrepair.site

Fundación Telefónica Dashboards
KPIs on the effectiveness of educational programs for Fundación Telefónica Ecuador.
Apache Hop, Looker Studio

SIMIEC
National immigration control system for Ecuador.
Java EE, C# / .NET, C++

Text Tools for Workdocs
A monday.com app to review, transform and find-and-replace selected text without leaving the document.
React, monday.com

Experience

Mar 2026 - Present
8 mos, Remote

Founder & Software Engineer, ECEELI LLC
Created Agonai, a competitive intelligence and AI Visibility platform, directing its development with AI coding agents in Elixir, Phoenix LiveView and Ash.

Oct 2025 - Mar 2026
6 mos, Remote

Ruby Developer, Globant
- Worked on Postmark's billing migration from Stripe to Adyen, following its acquisition by ActiveCampaign.
- Refactored the billing code with the Adapter pattern to decouple it from the payment provider, built a REST API client and added tests.

Sep 2024 - Oct 2025
1 yr 2 mos, Remote

Software Developer and Data Analyst, Kynsoft
- Migrated around 7 million records from DB2 to PostgreSQL, including the ETL processes, with no data loss.
- Built Looker Studio dashboards for Fundación Telefónica Ecuador.

Aug 2022 - Jul 2024
2 yrs, Remote

Senior Ruby on Rails Developer, Dominion Global
- Built new features for a client's Ruby on Rails application for creating reviews.
- Introduced Turbo Streams push notifications for report processing, a heavy, long-running task, so users are told when their reports are ready.
- Improved the UX with Stimulus.

Aug 2019 - Jul 2022
3 yrs, Remote

Senior Ruby on Rails Developer, Admios
- Developed new features for a client's Ruby on Rails SaaS for auto repair shops.
- Built the webhooks mechanism that notifies other users asynchronously when certain events happen.

Apr 2015 - Mar 2019
4 yrs, Ecuador

IT Analyst / Backend Java Developer, Ministerio del Interior, Ecuador
Architected SIMIEC, the national immigration control system, serving millions of users with 99.9% uptime.

Jan 2015 - Dec 2015
1 yr, Ecuador

Software Developer (Java), AEC Inter S.A.
- Architected the LOTAIP government transparency system.
- Built the electronic invoicing integration for Correos del Ecuador in Java: XML invoices signed with private keys and sent to the tax authority (SRI) for validation, plus a portal where users view their invoices.

2004 - 2015

Earlier experience
Ruby on Rails and Java roles, including team member payments for a project management system at Gmixon, the SITRAN ERP at Transtur Varadero and alas-HIS backend modules with HL7 integrations at Universidad de las Ciencias Informáticas.

Education

Master in Software Development, University of Informatics Sciences, Cuba
Bachelor in Computer Science, University of Havana, Cuba

Certifications

Triplebyte Certified Generalist Software Engineer
EF SET Certificate, Professional English

Languages

Spanish (native), English (professional), French (basic), Italian (basic)
