

Maykell Sánchez Romero

Senior Software Engineer, Ruby on Rails & React

Ecuador, UTC-5 (within 1 hour of US Eastern time) Open to remote roles kellsaro@gmail.com [linkedin.com/in/kellsaro](https://www.linkedin.com/in/kellsaro) github.com/kellsaro kellsaro.github.io

Senior software engineer and computer scientist with 15+ years building production systems, from a national immigration platform serving millions of users to AI-powered SaaS products. I specialize in Ruby on Rails and React, backed by solid Java experience, and build products end to end with a rigorous AI-assisted engineering workflow, which I am also using to move my stack toward Elixir and Phoenix LiveView.

Current focus	AI-assisted software engineering. Agentic development with LLMs (Claude Code, Codex and others) for fast system development with accountability: specs, reviewed plans with checkpoints, cross-review by two agents, full test suites and security checks. Distributed systems. Distributed systems architecture for fast, scalable, resilient, maintainable solutions. Elixir and Phoenix LiveView. Growing toward Elixir as my next main stack, with two products already built in it.	
---------------	---	--

Technologies	Backend	Ruby, Ruby on Rails, Sidekiq, RSpec
	Frontend	React, JavaScript, Hotwire (Turbo, Stimulus), Tailwind CSS
	AI engineering	Claude Code, Codex, Windsurf, LLM APIs (OpenAI, Claude, Gemini), Spec-driven development, Cross-agent code review, Agent rules and skills
	Elixir (growing)	Elixir, Phoenix LiveView, Ash Framework, Oban
	Data & APIs	PostgreSQL, Redis, MySQL, DB2, REST APIs, GraphQL, Payments (Stripe), ETL (Apache Hop, Looker Studio)
	Also strong in	Java, Spring Boot, Jakarta EE
	DevOps & quality	Docker, AWS (S3, EC2, RDS), Fly.io, Heroku, GitHub Actions (CI/CD), Git, Linux, Agile

Projects	Agonai Competitive intelligence system for the AI era. Elixir, Phoenix LiveView, Ash, LLMs, agonai.io	TechRepair Operations platform for wind turbine blade and tower maintenance teams, built around the work order lifecycle, where projects, teams, field activity and client reports converge. Elixir, Phoenix LiveView, Ash, GraphQL, techrepair.site
	Fundación Telefónica Dashboards KPIs on the effectiveness of educational programs for Fundación Telefónica Ecuador. Apache Hop, Looker Studio	SIMIEC National immigration control system for Ecuador. Java EE, C# / .NET, C++
	Text Tools for Workdocs A monday.com app to review, transform and find-and-replace selected text without leaving the document. React, monday.com	

Experience	Mar 2026 -Present 7 mos, Remote	Founder & Software Engineer, ECEELI LLC Created Agonai, a competitive intelligence and AI Visibility platform, directing its development with AI coding agents in Elixir, Phoenix LiveView and Ash.
	Oct 2025-Mar 2026 6 mos, Remote	Ruby Developer, Globant Billing system migration for Postmark, from Stripe to Adyen, applying the Adapter pattern.
	Sep 2024-Oct 2025 1 yr 2 mos, Remote	Software Developer and Data Analyst, Kynsoft Migrated around 7 million records from DB2 to PostgreSQL, including the ETL processes, with no data loss; Looker Studio dashboards for Fundación Telefónica Ecuador.
	Aug 2022-Jul 2024 2 yrs, Remote	Senior Ruby on Rails Developer, Dominion Global Rails systems for global clients, external integrations and ETL pipelines.
	Aug 2019-Jul 2022 3 yrs, Remote	Senior Ruby on Rails Developer, Admios Improved team productivity by 20% through automation tools.
	Apr 2015-Mar 2019 4 yrs, Ecuador	IT Analyst / Backend Java Developer, Ministerio del Interior, Ecuador Architected SIMIEC, the national immigration control system, serving millions of users with 99.9% uptime.
	Jan 2015-Dec 2015 1 yr, Ecuador	Software Developer (Java), AEC Inter S.A. Architected the LOTAIP government transparency system.
	Apr 2013-Mar 2015 2 yrs, Remote	Ruby on Rails Developer (Freelance), Gmixon
	2004-2013	Earlier experience Ruby on Rails and Java roles, including the SITRAN ERP at Transtur Varadero and alas-HIS backend modules with HL7 integrations at Universidad de las Ciencias Informáticas.

Education	Master in Software Development , University of Informatics Sciences, Cuba Bachelor in Computer Science , University of Havana, Cuba Triplebyte Certified Generalist Software Engineer EF SET Certificate , Professional English
